# Harish Yerraguntla

**Senior UI/ Front end/ Full Stack Developer**
**PH NO: 205-736-5808**
**Yerraguntlaharish27@gmail.com**
**https://www.linkedin.com/in/harish-70695416b/**

## PROFESSIONAL SUMMARY

- **Senior Frontend / UI Engineer** with Around **10 years** of **experience** designing, developing, and delivering enterprise-scale web and mobile applications across Banking, Healthcare, Mortgage, Airlines, and Financial Services domains, following full **Software Development Life Cycle (SDLC)** methodologies.
- Proven expertise in architecting modern, scalable Single Page Applications (SPAs) using **React.js**, **Next.js**, **Angular**, **Vue.js**, **TypeScript**, and **JavaScript (ES6+)**, with strong emphasis on performance, accessibility, and maintainability.
- Extensive experience leading front-end development efforts from requirements analysis and UI/UX design through development, testing, deployment, and post-production support in Agile (Scrum, XP) and Waterfall environments.
- Strong background in building responsive, mobile-first, and cross-browser compatible user interfaces using **HTML5**, **CSS3**, **Tailwind CSS**, **Bootstrap**, **Material UI**, **SASS/SCSS**, **Flexbox**, and **CSS Grid**.
- Expert in state management and application architecture using **Redux**, **Redux Toolkit**, **Flux**, **Context API**, **Vuex**, and unidirectional data flow patterns for large-scale enterprise applications.
- Hands-on experience developing server-side rendered (SSR) and SEO-optimized applications using **Next.js** to improve performance, page load speed, and search engine rankings.
- Proficient in integrating **RESTful APIs**, **SOAP services**, **GraphQL APIs**, and **WebSockets** for real-time data exchange, complex workflows, and high-volume transactional systems.
- Strong experience collaborating with backend teams to design, optimize, and deprecate APIs, improve scalability, reduce latency, and enhance overall system performance.
- Demonstrated expertise in cloud-native UI development, deploying applications on **AWS (EC2, S3, ELB, IAM, CloudWatch)** with CI/CD pipelines using **Jenkins** and **Azure DevOps**.
- Extensive experience implementing secure authentication and authorization mechanisms using **OAuth 2.0**, **OpenID Connect**, **JWT**, **Okta**, and **Auth0** to meet enterprise security and compliance standards.
- Proven ability to design and develop reusable component libraries and design systems using **Storybook**, **Atomic Design principles**, and modular UI architectures across multiple platforms.
- Strong background in accessibility engineering, leading **WCAG 2.0/2.1 AA** compliance initiatives using semantic HTML, **ARIA**, **Lighthouse**, **axe-core**, keyboard navigation, and screen reader support.
- Experienced in frontend performance optimization techniques including code splitting, lazy loading, asset bundling, caching strategies, and browser profiling tools.
- Hands-on expertise in data visualization and dashboard development using **D3.js**, **Chart.js**, **vue-chart-js**, and custom analytics components for business and clinical insights.
- Solid experience building cross-platform mobile applications using **React Native**, **Ionic**, **Xamarin**, and **TypeScript**, following reusable component and OOP design patterns.
- Strong knowledge of backend technologies including **Node.js**, **Express.js**, **ASP.NET Core**, **.NET MVC**, **Ruby on Rails**, and **SailsJS**, enabling effective full-stack collaboration.
- Proficient in working with relational and NoSQL databases such as **SQL Server**, **MySQL**, **Oracle**, **MongoDB**, and designing efficient data access patterns.
- Extensive experience writing unit, integration, and end-to-end tests using **Jest**, **Jasmine**, **Karma**, **Mocha**, **React Testing Library**, **Cypress**, **XUnit**, and **NUnit** to ensure high code quality and reliability.
- Strong advocate of **Test-Driven Development (TDD)**, code reviews, performance audits, and best practices to maintain clean, scalable, and maintainable codebases.
- Experienced in implementing CI/CD workflows, version control strategies, and release management using **Git**, **GitHub**, **Bitbucket**, **SVN**, **Jenkins**, and **Azure DevOps**.
- Demonstrated leadership in mentoring junior developers, conducting technical reviews, enforcing coding standards, and driving UI engineering best practices across teams.
- Proven ability to translate complex business requirements, wireframes, and UX designs into high-quality, production-ready applications.
- Extensive experience in healthcare and financial systems, delivering **HIPAA-compliant**, secure, and high-availability applications with strict data governance standards.
- Strong troubleshooting and debugging skills using modern browser developer tools, performance profilers, and logging systems to resolve complex UI and integration issues.

- Highly adaptable and results-driven engineer with a strong passion for continuous learning, modern frontend ecosystems, and delivering exceptional user experiences at enterprise scale.

**TECHNICAL SKILLS**

| | |
|---|---|
| **Frontend Technologies** | HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Angular, AngularJS, Vue.js, React Native |
| **UI Frameworks & Styling** | Tailwind CSS, Bootstrap, Material UI, SASS, SCSS, LESS, Flexbox, CSS Grid |
| **State Management** | Redux, Redux Toolkit, Flux, Vuex, Context API |
| **Backend & APIs** | Node.js, Express.js, ASP.NET Core, .NET MVC, Ruby on Rails, SailsJS, RESTful APIs, SOAP APIs, GraphQL |
| **Databases** | SQL Server, MySQL, Oracle, MongoDB, NoSQL |
| **Cloud & DevOps** | AWS (EC2, S3, ELB, IAM, CloudWatch), Jenkins, Docker, Azure DevOps, CI/CD Pipelines |
| **UI/UX & Visualization** | D3.js, Chart.js, Flickity.js, Storybook |
| **Web Standards & Accessibility** | WCAG 2.0/2.1, ARIA, Lighthouse, ESLint, Axe-core |
| **Methodologies** | Agile (Scrum, XP), TDD, SDLC |
| **Other Technologies** | WebSockets, RxJS, AJAX, jQuery, FHIR APIs |
| **Testing & Quality** | Jest, Jasmine, Karma, Mocha, Enzyme, React Testing Library, Cypress, XUnit, NUnit |
| **Authentication & Security** | OAuth 2.0, OpenID Connect, JWT, Okta, Auth0 |
| **Build & Tooling** | Webpack, Babel, Grunt, Gulp, NPM, Yarn |
| **Version Control & CI** | Git, GitHub, Bitbucket, SVN |

**WORK EXPERIENCE**

**Client: Thomson Reuters, Eagan, MN.** **May 2024 – Present**
**Senior Frontend Developer (React.JS)**

**Responsibilities:**
- Designed, developed, and tested responsive web applications using HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript, React.js, and Next.js, ensuring cross-browser compatibility, performance optimization, and adherence to modern web standards and accessibility guidelines.
- Applied advanced UI optimization techniques including sprite images, asset bundling, and code splitting to reduce page size and improve load times.
- Utilized HTML5 APIs such as Local Storage and Session Storage for client-side data persistence.
- Collaborated closely with backend teams to optimize and deprecate inefficient API calls, improving performance and scalability.
- Developed Vue.js applications using TypeScript and VuePress, managing component communication through events and parent-child hierarchies.
- Implemented complex forms, validations, directives, controllers, modules, and HTTP services across frontend frameworks.
- Built reusable widgets using React.js, NPM packages, Redux, ES6 features, and WebSocket event handling libraries.
- Utilized Tailwind CSS utility-first responsive classes to ensure seamless experiences across desktops, tablets, and mobile devices.
- Developed enterprise-grade UI components using HTML, XHTML, and CSS3 following organizational coding standards, with hands-on experience in Vuex and Vue Router.
- Implemented drag-and-drop functionality using React-Draggable.
- Implemented React Router to transform applications into efficient Single Page Applications (SPA).
- Addressed cross-browser compatibility challenges using React.js, ensuring stable functionality across Chrome, Firefox, Safari, and legacy Internet Explorer versions.
- We hosted all our micro services in AWS cloud infrastructure using Jenkins CI/CD pipelines.
- Created reusable and scalable CSS and SCSS templates, managing layouts, backgrounds, positioning, typography, spacing, tables, and responsive grids to maintain UI consistency across enterprise applications.
- Engineered elegant, SEO-optimized user interfaces leveraging Bootstrap, Tailwind CSS, SCSS, and modern layout techniques to improve Google search rankings and overall user engagement.

- Implemented HTML5 form validation, Angular 18 form validation, and client-side interaction logic to ensure data integrity, usability, and enhanced user experience.
- Designed enterprise UX component libraries including buttons, inputs, toggles, dropdowns, icons, and carousels using flickity.js.
- Integrated real-time geolocation tracking using WebSockets.
- Implemented Redux middleware, including Redux-Promise, action creators, reducers, and store state management.
- Built cross-platform mobile applications using React Native and TypeScript, following reusable component patterns.
- Applied Object-Oriented Programming (OOP) principles to design reusable UI components across web and mobile platforms.
- Developed Next.js applications with server-side rendering (SSR) to improve page load performance, SEO, and scalability.
- Built desktop and mobile UIs using WinForms (VB.NET) and Xamarin with C# to create native cross-platform applications.
- Built scalable SPAs using React, ES6, Webpack, Grunt, Redux, and Flux, leveraging component-based and unidirectional data flow architectures.
- Worked extensively with React components, forms, events, animations, routing, and state management patterns to deliver dynamic user interfaces.
- Integrated UI layers with relational databases using SQL, ensuring secure data handling, performance optimization, and data accuracy.
- Collaborated with backend systems using MS SQL Server, MySQL, MongoDB, NoSQL, and deployed applications on Apache Tomcat and WebLogic servers; implemented responsive layouts using Flexbox and Material UI.
- Designed and developed internal web applications using ASP.NET MVC5 for enterprise users.
- Led UI development for React Native mobile applications, implementing authentication with AWS Identity services, background jobs, mobile databases, and mentoring junior developers for production delivery.
- Implemented WebSockets with React to enable real-time state synchronization across multiple user roles and sessions.
- Consumed and integrated RESTful APIs (GET, POST, PUT, and DELETE) for seamless frontend-backend communication.
- Integrated AWS services to fetch and render media assets in UI layers; utilized React Flux for single-directional data flow; managed source control using Git and GitHub.
- Developed applications using ASP.NET Core following Service-Oriented Architecture (SOA) principles.
- Designed and implemented XML Web Services using C#, integrating them with React.js, Redux, and Next.js frontends.
- Developed reusable, optimized .NET components using C#, promoting maintainability and performance.
- Engineered modular clinical UI components using Vue.js and Tailwind CSS, Utilized Storybook for component-driven development following Atomic Design principles, building shared UX libraries and internal platforms using React, Next.js, Express, and Node.js.
- Wrote comprehensive unit tests using Jest, Enzyme, Jasmine, generated coverage reports with Istanbul, and ensured code quality.
- Used JIRA for defect tracking, sprint coordination, and issue management.
- Led WCAG accessibility remediation initiatives for hospital systems using ESLint, Lighthouse, SCSS variable theming, keyboard navigation, screen reader compatibility, and color-contrast compliance.
- Performed extensive debugging using Firebug, IE Developer Tools, and modern browser dev tools to resolve UI issues.
- Actively collaborated with QA teams, Scrum Masters, and Business Analysts, conducting system testing and regression testing to ensure production-ready UI delivery.
- Developed responsive and interactive UIs using React, leveraging component-based architecture for scalability.
- Implemented SOAP and RESTful Web Services to transmit large XML and JSON payloads efficiently.
- Designed UI layers following Spring MVC architecture using Spring Boot, implementing structured and maintainable frontend integration patterns.

**Environment:** HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript (ES6), React.js, Next.js, Redux, Vue.js, TypeScript, Vuex, Vue Router, React Native, WebSockets, ASP.NET Core, C#, SQL Server, MongoDB, Jenkins, AWS, Git, Jest

**Client: DTCC - Coppell, Texas.** **Nov 2021– April 2024**
**Senior Frontend Developer**

**Responsibilities:**
- Lead the Software Development Life Cycle (SDLC) for front-end product development, ensuring adherence to Agile (Scrum, XP, and Pair Programming) and Waterfall methodologies.

- Developing high-quality Web applications while improving and maintaining an existing MVC code base Wrote Typescript codes to develop different functionalities and view parts for the UI (User Interface).
- Developed maintainable CSS style sheet on LESS pre-processor incorporated its dynamic features such as variables, operations and mixings. Developed SCSS, CSS3 style sheets to give gradient effects.
- Implemented robust authentication and authorization mechanisms using OAuth 2.0 and OpenID Connect to enforce user access control in compliance, utilizing tools like Auth0 and Okta.
- Design and develop Single Page Applications (SPAs) with React JS, leveraging microservice architecture for scalability and maintainability.
- Worked with JASMINE unit test framework to write unit tests for JavaScript code.
- Worked by using React JS components, Forms, Events, Keys, Router, Animations, and Flux concept
- Build responsive, modern UIs using React, Redux, React Router, Hooks, Context API, Bootstrap, HTML5, CSS3, SASS, JavaScript (ES6+), jQuery, AJAX.
- Translate wireframes and design mockups into high-quality, production-ready code using React JS, Redux, WRIA2.0/WRIA3.0 frameworks.
- Used JIRA extensively for organizing issues, tracking the assigned work, and following team activity.
- Implemented Logic for pulling the data from the REST API with Axios AJAX and issued HTTP requests to interact with REST endpoints.
- Implement advanced React patterns including Portals, Higher Order Components (HOCs), Render Props, Fragments, and Custom Hooks.
- Developed dynamic responsive Web Application by integrating Angular with Bootstrap, which is further integrated with Web Services and Vue.js.
- Optimize performance with React Lifecycle Methods, Functional Components, Class Components, Props, State, Forms, and Events.
- Write unit, integration and functional test cases using the Jest, Mocha JS libraries to implement TDD approach.
- Conduct code reviews, design reviews, and performance audits to ensure best practices in React component structure and maintainability.
- Mentor junior developers on React best practices, Git workflows, debugging techniques, and CI/CD pipelines.
- Manage source code and deployments using Git (GitHub, Bitbucket), SVN, CVS, Mercurial, JIRA, Jenkins, Azure DevOps, Grunt, Gulp.
- Implement CI/CD pipelines for seamless integration and deployment of React applications.
- Conduct unit testing and regression testing with Jest, React Testing Library, Enzyme, ensuring robust and bug-free releases.
- Debug and resolve front-end issues using React Developer Tools, Chrome DevTools, ESLint, Prettier for code quality and consistency.
- Integrate RESTful APIs and Node.js APIs for client-server communication, ensuring secure and efficient data flow.
- Develop reusable, modular components to streamline development across multiple projects.
- Called the Restful web services calls for POST, PUT, DELETE and GET methods.
- Collaborate with QA teams to identify, track, and resolve bugs, ensuring smooth production deployments.
- Enhance user experience by implementing cross-browser compatibility and responsive design principles.
- Monitor and improve front-end performance using tools like Webpack, Babel, Lighthouse, Redux DevTools.
- Strong knowledge on working with Graph QL schema, queries and mutations to interact with Mongo DB and several other data layers. Worked with pods and made a customized UI Kit for the application.
- Design wireframes and mockups for mobile apps and web applications, ensuring functional and aesthetic alignment.
- Work with relational databases (MS SQL, PL/SQL, Oracle 9i/10g/11g) to create stored procedures, triggers, and optimize queries.
- Stay updated with the latest React ecosystem trends, libraries, and tools to continuously improve team efficiency and product quality.

**Environment:** HTML5, CSS3, SASS, LESS, JavaScript (ES6+), TypeScript, React.js, Redux, React Router, Angular, Bootstrap, jQuery, Axios, GraphQL, MongoDB, Node.js, OAuth 2.0, Okta, Jenkins, Azure DevOps, Git, Jest, Webpack.

**Client: Universal Health Services – PA, USA.** **Feb 2020 – Oct 2021**
**Senior Frontend UI Developer**

**Responsibilities:**
- Developed and implemented web applications using Full Stack technologies including SQL Server, .NET Core, Angular, AngularJS, Node.js, HTML5, CSS3, and JavaScript.

- Collaborated with business analysts to translate mock-ups and wireframes into dynamic single-page applications (SPA) using Angular, HTML5, CSS3, and JavaScript.
- Built secure, patient-facing dashboards using React.js and TypeScript, implementing end-to-end encryption, HIPAA-compliant data flows, and secure authentication mechanisms via OAuth 2.0, OpenID Connect, and Okta.
- Designed and built .NET Core microservices and developed RESTful APIs to support hybrid front-end applications.
- Implemented SPA-based front-end modules for user requests, records history, and security settings using AngularJS and JavaScript.
- Designed and managed data storage and retrieval processes using MongoDB (Column-Oriented Database).
- Delivered responsive and mobile-friendly web designs leveraging AngularJS and modern web standards.
- Designed and developed front-end architectures using Vue.js (Vue 2), including data visualization using vue-chart-js for analytical dashboards.
- Created and validated interactive forms using AngularJS, jQuery, and JavaScript to ensure data integrity.
- Utilized Bootstrap tables, grids, and responsive components for effective UI data presentation.
- Designed and implemented a cash flow analysis chart mapping monthly expenditures using D3.js.
- Enhanced user experience by integrating jQuery UI widgets such as select menus, accordions, and date pickers.
- Built and maintained application backends using Node.js application servers, aligning with HIPAA data minimization principles and real-time form validation.
- Implemented RESTful routing in Node.js to handle form submissions and persist data in MongoDB.
- Ensured cross-browser compatibility and modern feature support using Modernizr.
- Applied Test-Driven Development (TDD) methodologies throughout the software development lifecycle.
- Utilized Git for version control and collaborative development.
- Delivered fully accessible web interfaces using Angular, achieving WCAG 2.0 AA compliance through semantic HTML5, ARIA roles, axe-core automated testing, and coordinated Cypress end-to-end validation with QA teams.
- Authored unit test cases and executed testing using Jasmine and Karma frameworks for JavaScript applications.
- Developed company-specific reporting tools using D3.js for advanced data visualization.
- Practiced Agile Scrum methodology for iterative analysis, design, and development of applications.
- Created custom CSS stylesheets using LESS compiler with dynamic features such as variables, operations, and functions.
- Enhanced system performance and user experience by developing RESTful services with AngularJS and AJAX to render JSON data on the UI.
- Leveraged Entity Framework and complex stored procedures for CRUD operations on SQL Server.
- Managed dependencies and installed packages using Node Package Manager (NPM) including Gulp, Express, Underscore.js, Mongoose, and Body-Parser.
- Built reusable service components with Angular services, Object-Oriented JavaScript, jQuery, HTML, and CSS3 based on visual design specifications.
- Developed FHIR-based secure APIs in Next.js, managing patient records with JWT authentication, GraphQL, Apollo Client, strict access controls, and healthcare compliance standards.
- Developed cross-platform mobile applications using the Ionic framework for both iOS and Android.
- Created custom Angular directives for reusable components such as browser controls, multifield form elements, background file uploads, and security features.
- Designed and implemented Angular-Bootstrap components including grids, toolbars, panels, combo-boxes, and buttons with filters for enhanced UI functionality.
- Built responsive web application pages using Angular services, components, and directives to consume RESTful APIs and perform CRUD operations.
- Applied SASS to create modular CSS frameworks for managing colors, font stacks, and dynamic styling.
- Developed internal organizational web applications using Angular MVC framework.
- Implemented secure communication protocols (HTTP/HTTPS) with Angular components for building RESTful services.
- Wrote and executed edge test cases in .NET Core using XUnit, NUnit, and Moq frameworks.
- Accessed and managed MongoDB data using Mongoose API for seamless backend integration with Node JS and used Angular CLI and NPM for scaffolding the Angular Application.

**Environment:** Angular, AngularJS, React.js, TypeScript, HTML5, CSS3, SASS, JavaScript, .NET Core, Node.js, MongoDB, SQL Server, Entity Framework, Bootstrap, D3.js, jQuery, OAuth 2.0, Okta, JWT, GraphQL, Git, Jasmine, Karma

**Client: Hawaiian Airlines - Honolulu, Hawaii.** **Mar 2017 – Nov 2019**
**UI Developer**

**Responsibilities:**

- Designed and implemented integrations with Airline SOAP API's, Insurance Agent REST APIs, and Payment Gateway services; proficient in handling SOAP APIs using XML/XSLT and developing RESTful APIs.
- Developed database schemas using Ruby on Rails Active Record ORM and integrated SailsJS with MongoDB via Waterline ORM to manage complete airline booking state across clusters.
- Worked in using React JS components, Forms, Events, Keys, Router.
- Led full-stack development of web applications with Angular front-end, REST APIs, and back-end services in Ruby on Rails and NodeJS.
- Built Angular single-page applications leveraging RxJS Observables and Angular HTTP for seamless REST API connectivity with SailsJS back-end.
- Created front-end interfaces using Embedded Ruby Templates (ERB), HTML5, jQuery, Bootstrap, and SCSS.
- Delivered end-to-end web applications following MVC architecture, ensuring scalability and maintainability.
- Maintained MySQL databases on AWS EC2, including replication, query optimization, backup/restore, and stored procedures.
- Utilized React Hook Form library for designing forms in React, implementing React Flux for data refinement and maintaining a single-directional flow.
- Worked on responsive design and developed a single ISOMORPHIC responsive website that could be served to desktop, Tablets and mobile users using React.js.
- Supported AWS infrastructure (EC2, ELB, S3, CloudWatch, CloudFormation, Auto Scaling, VPC, IAM, Snapshots, Recovery) to ensure reliability and performance.
- Implemented Docker across development, testing, and staging environments.
- Automated CI/CD pipelines using GitHub and Jenkins; wrote Chef scripts for infrastructure-as-code and maintained Chef server.
- Configured Nginx with Phusion Passenger in production for reverse proxy, load balancing, and high availability.
- Ensured application uptime under heavy traffic using AWS Auto Scaling and ELB; performed Ubuntu server crash recovery and scheduled snapshot maintenance.
- Integrated Memcached for session management and ORM query caching to improve application speed and support multi-tenancy.
- Contributed to the development of ReactJS applications using Redux for state management, Material UI for styling, and React-Router for client-side routing.
- Synchronized client data centers with AWS VPC for log monitoring and database backups.
- Experienced in web scraping, unit testing, and integration of third-party plug-ins and gems.
- Configured Zoho ERP modules including Mail, Taxation, and Customer Support.

**Environment:** React.js, Angular, JavaScript, HTML5, CSS3, SCSS, Ruby on Rails, Node.js, SailsJS, MongoDB, MySQL, SOAP APIs, REST APIs, AWS EC2, AWS S3, AWS ELB, AWS IAM, Docker, Jenkins, Chef, Nginx, Redux, GitHub

**Client: Mizuho Americas – New York, NY.** **Jan 2015 – Dec 2016**
**UI Developer**

**Responsibilities:**
- Responsible for constructing front-end UI designs using a stack of technologies, including HTML5, CSS3, SASS, SCSS, Typescript, JavaScript, and Angular, leveraging Angular material.
- Collaborated on Angular forms, validations, modules, components, directives, controllers, and HTTP Requests, ensuring a seamless user experience.
- Called the Restful web services calls for POST, PUT, DELETE and GET methods.
- Implemented a single-page web application for efficient user interaction, incorporating both custom and built-in Angular Directives.
- Built robust client-side validation mechanisms using CSS and Angular Form Validation to enhance data input accuracy.
- Implemented dynamic and responsive data displays based on user inputs, employing Two-Way Data Binding for real-time updates
- Performed the System Testing, Regression Testing for Complete UI after fixing the Issues, which are reported by Testing Team.
- Executed HTTP calls from browsers to the server side to efficiently retrieve data for users.
- Contributed to the development of a single-page application using AngularJS, ensuring cross-browser functionality with HTML5, CSS, JavaScript, and JQuery.
- Implemented key functionality using Angular, Typescript, and ES6, leveraging Angular routing features for component independence.

- Utilized Angular services to communicate with Express.js on the server-side, facilitating CRUD operations on the database.
- Created diverse single-page applications using Angular for users, sponsors, reviewers, and publishers.

**Environment:** Angular, AngularJS, TypeScript, JavaScript, HTML5, CSS3, SCSS, Angular Material, Bootstrap, jQuery, REST APIs, Express.js, Node.js, SQL Server, Two-Way Data Binding, Angular Routing, HTTP Client, Git, Jasmine, Karma, Chrome DevTools, CSS Validation, WCAG Standards.

**EDUCATION:**

Master's in computer science, SUNY New Paltz, NY
